

Are you a junior embryologist, and would like to join a major international group to support our patients' families?

IVIRMA Italia, a leading entity in the field of Assisted Reproductive Medicine, is seeking a Junior Embryologist, under a freelance contract, to be included in our team in Pescara (9.Baby).

What will be the main responsibilities?

- Analysis and preparation of semen samples
- Management of culture plates for gametes
- Monitor and grade embryo development
- Support all the activities connected to IVF, according to the actual level of skill
- Documenting and accurately reporting all laboratory data and patient results
- Ensuring compliance with health and safety standards

What are the characteristics of the ideal profile?

- Master's degree in Biology, or equivalent qualifications
- Mandatory: Registration within the Italian National Association of Biologists (please consider that, for professionals that graduated abroad, the process takes up several months)
- Professional insurance
- Previous experience in an IVF/Embryology laboratory
- Familiarity with key computer tools

The initial contract will be on a freelance basis for one year.

In order to send your application, please send your CV to recruitment.it@ivirma.com and include "Junior Embryologist" in the e-mail subject.

Commitment to Diversity, Equity & Inclusion

We are an equal, diverse and inclusive employer and we are committed on creating a supportive workplace in which everyone is treated fairly, with respect and has the opportunity to contribute our mission while realizing the own potential. This means leveraging the unique skills that each individual brings and we do not discriminate against any employee or applicant because of race, sex, color, age, national origin, sexual orientation, religion, disability, or others. We actively support Sustainable Development Goal 5, Gender Equality.
